

GUY2GUY PHASE THREE BETA TEST: BASELINE SURVEY

Welcome to Guy2Guy! We're pleased you're here.

To get you started in the program, we need to ask you a few questions (well, more than a few – but it shouldn't take more than about 30 minutes).

All of your answers will be kept private.

Before we get started, please read through the informed assent. It is the same as what you and Tonya went through on the phone - we just need you to click 'I agree' here for our records.

Background/Purpose

The Center for Innovative Public Health Research and Northwestern University have developed a healthy sexuality and HIV prevention program for teenage guys who are gay, bisexual, and queer. The program will be sent via text messaging. This research study is sponsored by the National Institutes of Health.

Procedures

You are being asked to take part in the beta test. It will last for about 8 weeks. You will receive text messages every day for a total of 6 weeks (with a two-week break in between the 5th and 6th weeks of messages). The messages will talk about things like dating, sex, using condoms when you have sex, and choosing not to have sex.

Here's how it will work:

1. We will ask you to complete an online survey before you start receiving program messages.
2. You will receive between 5-10 text messages every day. You will be matched with a “text buddy” – who is another guy in the beta test that we will pair you with. We will ask you to send at least two text messages to your text buddy every day. There is also a G2Genie that can send you immediate advice about various things (like condoms) when you text him. We'll also ask you to please test out G2Genie several times.
3. At the end of each of the 6 weeks you receive text messages, we will schedule a 10-minute discussion with you over the phone to talk about your experience with the program and to identify areas for improvement in the program.

4. We also will send you a word document that has all of the program messages in it. You can provide feedback on specific messages there.

You will receive a \$30 Amazon gift card if you complete the beta test. This means: receiving all 6-weeks of the program messages and completing the one-on-one phone discussion each of the 6 weeks you receive messages.

Risks and Discomforts

The text messages talk about being gay and bisexual, and guys having sex with guys. It is possible that your privacy will be broken if someone sees the messages on your cell phone. Please think about what it would mean for you if this happens. We want you to be sure it's safe for you to take part in the program.

It also is possible that a question in the survey we ask might make you feel uncomfortable. If this happens, you can skip the survey question. If the program messages make you feel uncomfortable, you can stop being in the beta test completely.

Benefits

We don't know if you will benefit from being part of the study, but your participation is important. Your participation will help us design a better health program for guys like you in the future.

Confidentiality

Your name and address will be kept separate from your survey responses. Study findings will be reported only for the whole group. Your individual results will not be reported. We will not tell your parents or anyone else outside of the research team what you say.

To help us protect your privacy, we have obtained a Certificate of Confidentiality from the United States Department of Health and Human Services (DHHS). With this Certificate, we cannot be forced to share information that may identify you, even by a court subpoena, in any federal, state, or local civil, criminal administrative legislative, or other proceedings. We will use the Certificate to refuse to give anyone information that will identify you, except when you tell us it is okay to do so. But in the unlikely event that you tell us that you are currently abusing or planning to abuse a child, or you're planning to harm yourself or another person, then we will report this information to the appropriate authorities.

Rights of Refusal and Withdrawal

It is your choice to take part in the beta test or not. If you decide not to take part, nothing bad will happen. You can drop out of the study at any time. Your complete participation during the entire study however, will help us determine which program works best.

Questions and Contact Numbers

If you have any questions about the information above, please contact Tonya at Tonya@InnovativePublicHealth.org or call 877-302-6858, ext. 806. You can also contact the Principal Investigator, Dr. Michele Ybarra (email: Michele@innovativepublichealth.org; telephone: 877-302-6858, ext. 801).

If you have any concerns about your rights in this research, please contact the Study Subject Adviser at Chesapeake Research Review, Inc., by email at adviser@irbinfo.com. The adviser can be contacted by calling collect at 410-884-2900.

Decision

Please click on the button below to indicate whether you agree to participate in G2G or not. Please note that standard text messaging rates will apply if you enroll in the program.

I agree

I do not agree

[If “I do not agree” is selected]

Thank you for your time. We respect your decision not to take part in the program. To help us design future studies, can you please tell me why you decided not to take part?

[non-required text box]

[If “I agree” is selected]

Great! Now, on to the survey!

If at any time, you need to take a break, you can click on the ‘pause’ button at the bottom of the screen; and come back later.

Let’s start off with some general questions about your cell phone. If you have more than one cell phone, tell us about the phone that you are using for Guy2Guy

1. On an average day, how many text messages do you **send**?
 1. NUMERIC: range 0 – 999
 2. Do not want to answer

2. On an average day, how many text messages do you **receive**?
 1. NUMERIC: range 0 – 999
 2. Do not want to answer
